Summary

Aspiring Software Engineer with strong knowledge of programming fundamentals and a keen interest in building scalable and efficient software solutions. Skilled in problem-solving, data structures, AI tools to build software and find bugs, and algorithms. A quick learner and team player with leadership qualities, passionate about exploring new technologies and contributing to impactful projects.

Education

- Vellore Institute of Technology Vellore, India
Master of Computer Application; CGPA: 8.60* July 2025 - Present
- Vellore Institute of Technology Vellore, India
Bachelor of Computer Science; CGPA: 8.90 July 2022 - May 2025

Projects

• **Hire Link Pro – Microservices–Based Job Portal** : Developed a job portal where candidates can search and apply for jobs, while recruiters can post and manage listings. Built separate user, job, and application services with REST APIs, JWT authentication, Axios-based communication, event-driven processing, and caching.

Tech: MongoDB, Express.js, React.js, Node.js, Docker.

• **MeetBrief AI – AI-Powered Meeting Summarizer** : Developed a full-stack application that converts meeting audio into transcripts, executive summaries, key decisions, and structured action items with owners and deadlines. Integrated Gemini AI with FastAPI using hallucination-aware prompting and built a React TypeScript interface with SQLite-based persistent storage.

Tech: React.js, TypeScript, Python, FastAPI, Gemini AI, SQLite, SQLAlchemy

• **Pandora – Skincare Product Recommendation System** : Developed a responsive web application that collects users' skin concerns and recommends suitable skincare products. Connected the frontend to a MySQL database through PHP for processing inputs and retrieving relevant recommendations.

Tech: HTML, CSS, JavaScript, PHP, MySQL

• **Railway Track Crack Detection System** : Developed an IoT prototype that moves along railway tracks and detects cracks using IR sensors connected to an Arduino Uno. Programmed the controller to stop the motor and send an alert to the administrator through a GSM module when a crack is detected.

Tech: Arduino Uno, Embedded C, IR Sensors, GSM Module, DC Motor

Skills

- **Programming Languages:** C, C++, Java, Python(Basics)
- **Databases:** MySQL, MongoDB
- **Web Technologies:** HTML, CSS, JavaScript, React, Node, Express
- **Tools & Concepts:** SDLC, IOT development, AI-assisted development & debugging, Machine Learning
